

Introducing the Professional Qualification

This 2-day PRINCE2 Practitioner course (based on PRINCE2: 2009) builds on the knowledge that participants have gained in the PRINCE2 Foundation course, and focuses on applying and tailoring PRINCE2 for the effective use of the PRINCE2 Project Management methodology in projects.

The purpose of the Practitioner qualification is to confirm whether the candidate has achieved sufficient understanding of how to apply and tailor PRINCE2 in a scenario situation. A successful Practitioner candidate should, with suitable direction, be able to start applying the method to a real project but may not be sufficiently skilled to do this appropriately for all situations. Their individual project management expertise, complexity of the project and the support provided for the use of PRINCE2 in their work environment will all be factors that impact what the Practitioner can achieve.

Learning Objectives:

At the end of this course, you will be able to:

- Understand and apply the PRINCE2 Project Management method
- Understand the implications of using and implementing PRINCE2
- Apply the principles of PRINCE2 to projects
- Manage quality, risks, and benefits
- Deliver projects on time, within budget, and to the specified business case
- Tailor PRINCE2 to different project environments

Learning Resources:

SMCE offers its learners a range of premium accredited learning resources. The list shown below is a reference list for the Training Providers in their consideration for supplemental material:

PMCPRCT02	Exam Tips, Exam Techniques
PMCPRCT03	Review/Practice Exam 1
PMCPRCT04	Review/Practice Exam 2
PMCPRCT05	Practitioner Exam

What is PRINCE2?

PRINCE2 is a non-proprietary method used extensively in more than 150 countries around the world, and its take-up grows daily. It is widely considered as the leading method in project management, with in excess of 20,000 organizations already benefiting from its pioneering and trusted approach. This is largely due to the fact that PRINCE2 is truly generic: it can be applied to any project regardless of scale, type, organization, geography or culture.

PRINCE2 comprises a set of principles, a set of control themes, a process lifecycle and guidance on matching the method to the project's environment.

PRINCE2 provides a process model for managing a project. This consists of a set of activities that are required to direct, manage and deliver a project.

Benefits of PRINCE2

PRINCE2 provides the following benefits:

- PRINCE2 can be applied to any type of project
- It provides a common vocabulary and approach
- PRINCE2 integrates easily with industry-specific models
- The product focus clarifies for all parties what the project will deliver to agreed quality standards
- PRINCE2 applies 'management by exception' providing efficient use of senior management time
- It ensures a focus on the continuing viability of the project
- There are scores of accredited training and consultancy organizations operating worldwide, which can supply expert support for PRINCE2 projects or for organizations planning to adopt PRINCE2
- It provides explicit definitions of roles and responsibilities so that everyone understands what is expected of them and what to expect of others.

Contact SMCE www.smce.org

The Service Management Center of Excellence - SMCE is a regional organization dedicated to the promotion of a culture of Service Excellence in public and private sectors. To achieve its stated goals, SMCE has aligned with leading local and international authorities in order to accelerate knowledge transfer and build local expertise in the area of Service Management.
